IN THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application.

1. (Currently amended) A video display system comprising

a lamp which is energized to produce an image,

means for receiving a power-off command,

means for maintaining the lamp in an off-condition during a predetermined cool-down period of time following receipt of the power-off command,

means for receiving a power-on command during the predetermined cool-down period of time, and

means for automatically powering on the lamp at the end of the predetermined cool-down period of time if the power-on command is received during the predetermined cool-down period of time.

2. (Currently amended) The video display system of claim 1 having means for signaling receipt of a power-on command during the cool-down period of time.

3. (Currently amended) The video display system of claim 1 having a power light emitting diode (LED) and means for blinking the power LED for the remainder of the cool-down period of time upon receipt of a power-on command during the cool-down period of time.

4. (Currently amended) The video display system of claim 1 wherein the means for maintaining the lamp in an off condition during the cool-down period of time comprises a timer.

5. (Currently amended) The video display system of claim 1 wherein the means for maintaining the lamp in an off condition during the cool-down period of time comprises a counter.

6. (Currently amended) A method of powering on a video display system having a lamp energized to produce an image comprising the steps of

- (a) maintaining the lamp in an off condition during a predetermined cool-down period of time following receipt of a power-off command and
- (b) automatically powering on the lamp at the end of the cool-down period of time if a power-on command was received during the cool-down period of time.

7. (Currently amended) The method of claim 6 further comprising the step of signaling receipt of a power-on command during the cool-down period of time.

8. (Currently amended) The method of claim 6 further comprising the step of blinking an indicator for the remainder of the cool-down period of time following receipt of a power-on command during the cool-down period of time.

9. (Currently amended) A program-containing computer readable medium encoded with a program which when executed by a processor maintains a lamp in an off condition during a cool down period of time and automatically powers on the lamp following the cooling down period of time if a power-on signal is received during the cool-down period of time.
